

Garmin® introduces the Approach® S60, a golf watch with modern style

New Garmin Golf app features weekly leaderboards, live scoring and more

SYDNEY, Australia - 1 June 2017 - Garmin Australia, today announced the Approach S60, its newest GPS golf watch with a sunlight-readable color touchscreen display and sleek new design that's made for everyday use both on and off the course. Preloaded with more than 40,000 courses from around the world with lifetime updates, the S60 features full-color course view mapping that golfers can view right from their wrist. It provides quick access to critical information needed during a round like precise yardages to greens, hazards and doglegs to help players master their game. With a modern style that goes beyond the clubhouse, the Approach S60 also features the popular QuickFit™ watchbands that can be easily interchanged in seconds, without tools. They're available in an assortment of colored silicone, leather or stainless steel styles, and can be interchanged with a number of Garmin multisport watches, including the popular fenix 5 series.

To add another level of fun and competition, the Approach S60 is one of the many Garmin golf watches compatible with the new Garmin Golf app that lets users compete in weekly leaderboards on any golf course. This free app allows users to compete against friends and fellow golfers on the same course, plus view other players' rank, score, handicap and more. Players can set up their own tournament event and invite multiple friends to compete, plus they can chat with each other and post their results for others to see. Using the Approach S60, players can also utilise the app for live scoring as they're playing their round; scores entered on the device will automatically sync to the app for instant updates as they play.

"The Approach S60 is as functional of a golf watch as it is a stylish timepiece," said Adam Howarth, General Manager Garmin Australasia. "It's packed with industry-leading features golfers have come to appreciate and rely on with our Approach series – like advanced AutoShot™, SwingTempo, touch targeting and more – yet it's the most stylish golf watch we've offered so it can easily be worn 24/7."

Thanks to the Garmin AutoShot game tracking technology¹, players can easily review, map and analyse all of their detected shots from each round they play with the Approach S60. It automatically records the location and distance of each detected shot and uploads it to the user's Garmin Connect™ account for post-round analysis. In addition to seeing how far a shot was, players can also use AutoShot data to compare stats from previous rounds, review distances for each club, and analyse their tendencies as they fine tune their game. The Garmin Connect mobile app can also be used to receive updates to the courses users play the most thanks to the CourseView auto updater, which automatically sends updates to the device.

The Approach S60 also features SwingTempo that measures the relationship between upswing and downswing, and TempoTraining that uses a 3:1 ratio and gives the user vibrations to synchronise their swing mechanics and fine-tune their swing tempo. When paired with the Garmin TruSwing™ sensor, it can also provide the user with swing speed and club path angles to improve their swing consistency.

Additionally, the Approach S60 measures precise distances to the front, back and middle of the green as well as the distance to course targets like sand traps, water hazards, layups and doglegs. Golfers can use the Green View feature to see the outline of the green on each hole, where they can manually position the pin to that day's location to get the most accurate

measurements. Thanks to the new PlaysLike feature, the Approach S60 can also take into account the elevation change between the player and the target and calculates what the distance will play like. For example, if the shot is downhill, PlaysLike will show that the shot will play shorter than it actually is.

Doubling as an all-day activity tracker², the Approach S60 works with the Garmin Connect mobile app to monitor and record daily steps, calories burned, distance and sleep, with move alerts to keep users active throughout the day. It also receives smart notifications from compatible smartphones³, so users can stay connected with notifications for call, texts, emails and more right on their watch. What's more, when paired with the app, the Approach S60 can also provide weather forecast data so players will know if they're going to stay dry on the course.

The Approach S60 can get up to ten hours of battery life golfing and up to ten days in watch mode with activity tracking. It boasts a 5 ATM water rating, so it can easily withstand the elements, whether golfers get caught in a sudden rainstorm or are sweating on a hot day. The Approach S60 is expected to be available in June in black or white with a recommended retail price of AU\$579. A premium version with a scratch-resistant ceramic bezel and black leather band will also be available for RRP AU\$699.

The Approach S60 is the latest solution from Garmin's expanding outdoor segment, which focuses on developing technologies and innovations to enhance users' outdoor experiences. Whether hiking, hunting, geocaching, golfing or using satellite communication, Garmin outdoor devices are becoming essential tools for outdoor enthusiasts of all levels.
